# POPULAR TOPICS

- Show the most popular topics based on a weighted algorithm
  - # replies
  - # views
  - # kudos
  - # attachments
  - accepted solution
- Allows each community to determine what “most popular” means
- Three custom components
  - Core - contains the main logic
  - Hero - most popular topic
  - List - most popular topics

# BENEFITS

- Keep your community content fresh daily by automatically promoting the most popular posts
- No manual intervention required
- Manual override is possible if desired
- Fully customizable
- Useful for any community

# CODE & CUSTOMIZATIONS

- <https://github.com/javamate/linc15>
- Uses Rest API v2
- Custom components
- Custom Settings
  - Popularity weights
  - Default hero image
- Custom Metadata
- Custom Text Properties
